Radiant Ridge Energy

Reliable Partner For Long-term Natural Gas Supply

Who We Are

Radiant Ridge Energy is a well-capitalized energy company focused natural gas power generation

We convert natural gas into electricity for power-intensive and industrial clients, ensuring reliable, efficient energy solutions.

Competitive Advantages

Inhouse Land Development

Dedicated land team with 20+ years expertise in mineral rights, surface access, and regulatory compliance. Streamlined approval processes.

Rapid Deployment

Integrated teams enable fast-track project execution. From contract to first gas in record time.

Well-Financed Operations

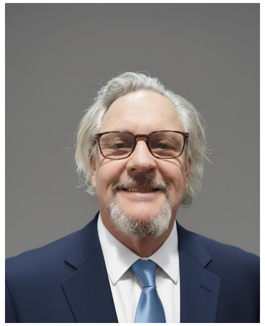
Well-capitalized with strong financial backing. Reliable partner who can provide LC or deposits, with strategic plans to scale to 500MW .

Engineering & Operation Capabilities

Engineering and operation department for facility design, site infrastructure, and operational optimization. Reduces deployment time significantly.

Leadership Team

Radiant Ridge Energy is backed by a seasoned executive team with extensive experience across energy operations, land management, finance, engineering, and legal. Our leadership has held senior positions at major energy companies and brings deep expertise in project execution, regulatory compliance, and strategic partnerships. This proven track record ensures reliable performance and seamless delivery from contract to commercial operations.



Kevin Capozzi

35+ years energy law expertise, former Gowling WLG senior partner

What We Need

For Business Growth and Development

Natural Gas Supply

Volume: Reliable, consistent supply to support growing operation

Term: Long-term contract (5-10+ years preferred)

Delivery: Firm transportation with flexible offtake points

Pricing: Competitive, market-based with potential for index-linked structure

Why Us?

01. Creditworthy Counterparty

Strong financials with ability to provide deposits and Letters of Credit

02. Long-Term Commitment

Stable demand for power generation - not subject to market volatility

03. Streamlined Execution

In-house land and legal teams accelerate contract finalization

04. Technical Competence

Engineering team ensures optimal gas utilization & minimal waste

05. Growth Potential

Expanding operations offer volume increase opportunities

Deployment Timeline

Contract Negotiation
GSA terms, pricing structure, delivery points

Infrastructure Development
Pipeline connections, metering, land access secured

Regulatory Approvals
AER and environmental permits finalized First Gas

Delivery
Commercial operations commence

Transaction Structure

Preferred Deal Terms

- **Contract Type:** Gas Supply Agreement (GSA)
- **Term:** 5-10 years (negotiable)
- **Take-or-Pay:** Flexible structure with minimum commitment
- **Pricing:** Fixed or AECO-indexed with potential collar structure
- **Credit Support:** Deposits & letter of credit available
